## UNITED STATES STEEL LEADS STOCK MARKET

Italian Victory Plays Part in Causing General Advance in Wall Street Prices.

STEEL CAN PAY DOUBLE TAXES

More Rumors About Tobacco Issues. Hide and Leather Up Again--Coppers Climb, and Are in Good

Demand.

By Broadan Wall.

New York, June 21.—United States Steel was the feature of trading in Wall Street all of the session to-day, it closed at about the best price, holding the whole list firm. Other stocks that distinguished themselves particularly were Wilson, Mexican Petroleum, Texas, Smeiters, Tobacco Products, General Stoors and Bethlehem B., all of which were at one time up 2 points—or more and most of which retained that much at the close of the day. Royal Dutch ended the day with a lose of 8 points.

Beason for the advance of stocks was the Italian victory, together with a rumor that new and unexpected help for the Italians holding well, and there is now no danger, the military authorities say, of that line being broken at any point. From now on the war is chiefy a question of getting together enough reserves to justify an offensive on the part of the allies. It is understood no offensive will be taken until next year, because by that time heavy bombing machines will be available to carry all the horrors of war as far as Berlin.

Removal of the price limit of grain, together with the report of conferences that are arranging for removal of the limit on other commodities and articles increased the cheerfulness of the Street.

Another factor was a report, understood to edanate from steel headquarters that the United States Steel corporation could pay double the tax of last year and yet show 30 per cent in its common stock. This would make a feduction of the dividend unnecessary. This accounted for the strength of all steel shares. There was excellent buying of Railway Steel Bprings and of Equipment stocks in general.

Tobacco stocks were the subject of rumors again, but no rumor proved to have a foundation. Tobacco from the stock was increased the company should prove true this stock would have to be retired at 10.

General Motors is still under the influence of an entrapped short interest. The premium for loaning the stock was increased to-day to 176 a day for 100 shares. The insiders took massures s

HIDE AND LEATHER

CONTINUE TO MAKE MONEY

Hide and Leather stocks made new tops again. The plan for paying off the back dividends on the preferred is finding new champions. The company is making money rapidly and the speculative feature of the stocks are proving very attractive.

Coppers were well purchased, and under leadership of American Smelting advanced an average of a point. It is understood at Washington that some relief is to be granted to copper companies before long. They will probably be the first to get advantage of the new business policy to be inaugurated in connection with the revised lax system.

NEW YORK, June 14.—Influenced by other security market and the improved war news, prices on the curb advanced sharply to-day, and business was in larger volume, industrials were more active and stronger than they have been recently. Chevrolet Motors scored the largest gain, advancing 7 points from the low of the day. United Motors advanced more than a point in sympathy and on the good demand. Houston oil declined more than 7 points during the morning session, and about half of this was recovered toward the close. Midwest Refining was again firm, although the gain was not large.

# **ACTION URGED ON** 5-CENT CAR FARE

Cost of Producing Car Rides Has Increased to Point Where Something Must Be Done.

On Thursday evening. June 27, the Committee on Streets of the City Council will hold a public hearing on the application of the street railway company for a five-cent fare.

This application has been pending for some time, and conditions of the street railway industry have reached such a stage that prompt action is being requested by the company in order to avoid impairment of the service.

The acute labor situation and the enormous prices that have to be paid for supplies have brought the situation right down to the question of whether the fare shall be increased to five cents or whether the service shall be curtailed. One or the other is inevitable since the company is no more able to cope with the present conditions than are the manufacturers and retailers of any other line of goods. It is costing the company more to produce car rides than ever before. It is going to cost even more, because wages will have to be further increased, and there is no hope of materials and coal remaining at even present prices.

The citizens of Richmond will have an opportunity at the above meeting to say which they prefer. The company prefers to maintain the preisin standard of service and to improve it further, if possible, because its reputation for service is at stake.

Richmond needs the best service to-day, and it is entitled to it. The company wants to give it and retain the good-will of its patrons. It cannot do this at the present rates of fare it cannot do the impossible of paying for labor and materials at present market prices and continue to give its patrons the same amount or the same quality of service. Something is bound to give.

The company is requesting the smallest increase possible to be helpful in maintaining the service.—Adv.
